

Professional SPA cosmetics and aromatherapy products

What is Bodhi

Bodhi in Sanskrit means enlightenment. This is nirvana during life. Complete harmony of mind and body. What many aspire to, but not everyone knows where to start this path...

Oriental SPA is the best place to take the first steps in search of harmony. In search of your Bodhi.

History of SPA in Thailand

The history of SPA in Thailand began over 2500 years ago with a therapy called Nuat Pheng Boran, known today as the Thai massage, one of the four branches of traditional Thai medicine. This technique was developed by a doctor named Jivaka Kumar Bhashi, the personal physician of the ancient Indian king Bimbisara and a friend of the Buddha. Together with massage techniques based on the philosophy of yoga and Ayurveda, through his students, he passed on the knowledge of the use of plants and minerals in treatment. It was from those events that the traditional Thai medicine began, based on the treatment of Thai massage and the gifts of nature. To this day, Dr. Jivaka is considered the "King of Medicine" in Thailand and is honored during religious ceremonies. Over the centuries, Thailand has developed and improved new massage techniques and herbal potions for use in healing, injury recovery after trauma, and rejuvenation treatments. This is how Thailand has become and remains the undisputed leader of this wonderful industry that combines elements of benefit and pleasure.

About Bodhi Products

We offer you and your clients truly high-quality SPA products that combine the power of herbal ingredients, delicate textures, and wonderful aromas.

There are more than 150 products from the Bodhi professional line for spas, wellness centers and massage rooms. These are products for complete face and body care, including cleansing, moisturizing, skin rejuvenation and massage. We also manufacture a wide range of aromatherapy products - essential oils and signature blends, aromatherapy candles and aroma diffusers - that will give your space the atmosphere you need to immerse yourself in an exotic world of enjoyment.

All Bodhi products are manufactured in Thailand in accordance with the GMP standard and are certified abroad.

Natural Formulas

While taking care of our health, we give preference to healthy food. At the same time, the skin, being the largest organ of the human body, absorbs and conducts through the bloodstream inward some of what we use during care. If you want to keep your body clean from the inside, choose natural products for care.

Bodhi cosmetics do not contain:

- parabens
- sulfates (SLS/SLES)
- mineral oils
- artificial colors
- ingredients of animal origin

We do not test products on animals.

When creating new products, we try to make them as natural as we can, and when technically possible, the formulas contain 100% of natural ingredients. This frees the body from toxic load and allergic reactions even those with particularly sensitive skin. More than 100 products under the Bodhi brand, consisting exclusively of plant components, some of which we grow ourselves.

Bodhi's rose farm in the village of Gaberovo, in the Bulgarian Valley of Roses

Face SPA

The Facial SPA line consists of 25 products and allows you to carry out complex spa treatments, including initial and deep cleansing, moisturizing, care for various skin types and massage. The compositions of each product are rich in active herbal ingredients, which not only allow you to perform the procedures, but also benefit in the long run. The use of these products can be compared to the use of vitamins.

All products have an economical consumption, and the treatment requires from 1 to 5 ml.

Magic of the Orient

Exquisite aromas and special cosmetic properties of Tibetan Jasmine, Thai Pomegranate and Japanese Yuzu give sophistication and uniqueness to each product, creating a synergy of results and pleasure.

Jasmine

Revitalizing treatment for sensitive and dry skin

Jasmine is a rare flower with a refined and intense oriental fragrance. Jasmine essential oil has an anti-inflammatory effect, so it is excellent for treating problematic skin and helps with dermatitis. Jasmine oil is also a natural antiseptic and has antifungal and antibacterial properties. Jasmine helps to balance skin moisture, whether it is oily or too dry.

Pomegranate

Antioxidant care for mature skin

Rich in antioxidants and a natural estrogen substitute, pomegranate reduces unevenness and hydrates the skin. Pomegranate extract counteracts the appearance of aging skin, maintaining its elasticity and smoothness. Due to its high vitamin C content, pomegranate extract promotes the formation of collagen, which helps to reduce the formation of wrinkles. At the same time, it supports the nutrition of skin cells and promotes its regeneration and healing. Pomegranate as a natural estrogen substitute is especially suitable for women over 40.

Yuzu

Citrus treatment for radiant skin

Yuzu essential oil has rejuvenating and regenerating properties. It perfectly moisturizes and gives the skin a visible vitality and radiance. Yuzu is popular for its refreshing and uplifting properties. It's used to brighten and revitalize the skin, improve blood circulation, and fight free radicals due to the presence of antioxidants and a particularly high content of vitamin C. The Yuzu range is suitable for any age and gender.

Micellar Water

Essential product for gentle cleansing and effective make-up removal from the face and eyes. Preserves water and lipid balance. Moisturized, clean velvety skin is ready for development. Suitable for hypoallergenic and hypersensitive skin.

250 ml | Consumption 3-6 ml

Face Toner

A delicate toner for sensitive skin, enriched with a cucumber extract and a Japanese plum extract, tones and moisturizes dehydrated, tired skin, normalizing its hydro balance. Aloe extract soothes and reduces inflammation, relieving discomfort. Using toner after washing or cleansing helps to balance the pH level and enhances the effectiveness of subsequent care.

500 ml | Consumption 5 ml

Face Cleansing Cream

Cleansing cream-foam for gentle cleansing. The soft foam removes all the pollution of the day and excess sebum without disturbing the lipid balance of the skin, thanks to the algae extract and polysaccharides. An essential element of care before using a scrub.

150 ml | Consumption 1.5-2 ml

• Pomegranate • Jasmine • Yuzu

Face Scrub Peeling

Sugar face scrub with oil-wax base. Helps even out skin texture and tone. Enriched with safflower, shea butter, sweet almond and grape seed oils, the scrub provides deep nourishment and hydration during the cleansing procedure. Castor oil smoothes wrinkles and refreshes the complexion. Vitamin E and bioflavonoids slow down cell aging and have a powerful tonic and antioxidant effect. Natural wax heals and prevents moisture loss.

200 ml | Consumption 3-5 ml

• Pomegranate • Jasmine • Yuzu

200 ml |

Cream-based masks for moisturizing and anti-aging care

Cream-based Jasmine face mask, thanks to the components (vitamin E, C squalane, hyaluronic acid), provides the skin with effective nutrition and hydration. Jasmine Sambac Absolute stimulates cell regeneration, smoothes wrinkles and prevents the appearance of new ones. Hydrolyzed baobab extract with a high content of vitamin F, restores the skin and increases its elasticity during age-related changes. Squalane improves cell oxygenation, while aloe leaf juice and sodium hyaluronate, help to retain the necessary moisture.

Pomegranate mask is ideal for transforming tired skin and a dull complexion. Active antioxidants from pomegranate extract protect the skin from the action of toxins, slowing down the aging process. Pomegranate promotes collagen production, restoring skin elasticity. Baobab and aloe leaf extracts supply the skin with nutrients and microelements that restore and tone it, while sodium hyaluronate prevents moisture loss. The application of the mask provides the skin with a rested look and a healthy glow.

A moisturizing mask helps to forget about dehydrated skin and a dull complexion. The complex of plant components, consisting of baobab extract, aloe leaves and squalane, fights dry skin, stimulates cellular processes and restores the hydro-lipid layer of the epidermis. The algae extract provides additional hydration and nutrition of cells, and hyaluronic acid's micromolecules replenish lost moisture and improve the appearance of the skin. Fine wrinkles are smoothed out, the skin becomes more elastic and the complexion is evened out. The mask helps to maintain the moisture level of the skin, preventing its premature aging.

Pentapeptide Mature Skin Mask helps stimulate collagen and produces healthy elastin for a smoother skin surface. It provides mature, tired skin with special care and additional nutrition. Vegetable squalane in the mask stimulates cellular respiration, improving tissue vitality. The complex of vitamins and fatty acids omega-3 and -6 from baobab oil is involved in the renewal of cell membranes and cell rejuvenation. The algae extract helps to maintain the proper level of moisture and skin tone. Vitamin E, known as the "vitamin of youth", slows down the appearance of visible signs of aging, fights pigmentation and improves skin elasticity. After applying the mask, the skin is visibly smoothed and more elastic.

Consumption 3-5 ml

Kaolin based cleansing and detox masks

The Yuzu mask is a must-have and a must-do for big cities inhabitants whose skin is exposed to aggressive environmental impact. Tired skin needs deep cleansing and help to get rid of harmful toxins. The Yuzu kaolin mask perfectly copes with this task. Absorbent components draw impurities to the surface, as well as remove excess sebum and make-up residue. Yuzu essential oil strengthens the skin's natural protective barrier. Hydrolyzed collagen hydrates the skin, while algae extract prevents collagen breakdown and blocks the enzyme that breaks down hyaluronic acid in the skin, thereby improving hydration and elasticity. The result is rested, radiant skin and a fresh complexion.

Purifying masks based on bentonite and kaolin clay and charcoal, for deep cleansing of the face, are suitable for people with combination and oily skin. Clay draws dirt, toxins, and make-up residues to the surface and nourishes the skin with minerals. Charcoal mattifies and dries inflammations. The tea tree essential oil fights bacteria and prevents acne. Aloe vera extract and allantoin, which prevent the skin from drying out, help to restore its water and mineral balance, promote skin regeneration and the disappearance of inflammation traces.

Massage Cream

Massage creams provide an easy and long-lasting glide during facial massage and nourish the skin with useful microelements, vitamins, and minerals. The algae extract strengthens skin turgor and facial contours, supplies vitamins A, C, D, F, PP. Aloe and cucumber extracts have antiseptic and tonic effects, and also help to maintain normal skin moisture levels (Natural Moisturizing Factor NMF).

Pomegranate extract is a source of B group vitamins, as well as C, K, and multiple microelements that nourish and protect the skin from harmful toxins, keeping it young and healthy.

Jasmine reduces irritation and redness caused by the active sun and unfavorable ecology. The precious jasmine oil helps restore elasticity and youthfulness to the skin of the face, neck and décolleté.

Yuzu peel essential oil with powerful antioxidant properties, protects skin cells from harmful toxins, and improves skin texture and tone.

250 ml | Consumption 3 ml

Herbal Massage Compress

Facial massage with an herbal compress reduces puffiness, fights wrinkles, dark circles, and provides immediate results for an overall face lift. A warm herbal compress infused with a blend of traditional Thai herbs, soothes and nourishes facial muscles and the delicate eye area. An herbal compress massage can be combined with other types of massage.

How to use the compress: Completely submerge it in water for about one minute. Then heat it in an herbal compress steamer for five minutes. The compress can also be heated in the microwave for two minutes. To achieve the maximum therapeutic effect, the steaming method is recommended. Before applying the compress directly to your face, make sure it does not burn by pressing it against your forearm. Start the massage with pressure movements, slightly twisting, dragging and pressing the compress against the skin.

50 gr

SPA facial treatment “Sunny Yuzu”

STEP 1 – Make-up removal

Carry out a preliminary cleansing of the skin of the face, neck, and décolleté with Micellar water.

- To remove eye makeup, soak 2 cotton pads with micellar water and apply to closed eyes, pressing firmly against eyelashes and eyebrows to “dissolve” makeup.

- Soak 2 cotton pads with micellar water and wipe the skin of the face, neck, décolleté, also paying attention to the skin behind the earlobes and the back of the neck.

- Delicately remove eye make-up, removing residue between the eyelashes and on the eyelids.

STEP 2 – Cleansing with cream

- Moisten your palms with warm water, lather the Cleansing Cream on one palm with your fingers and apply to the face and neck. Work in circular motions on the skin for 2-3 minutes, going down to the neck and upper décolleté, avoiding the area around the eyes.

- Remove the remaining cleanser with a warm, damp towel, and gently remove the remaining makeup from the eyes.

STEP 3 – Exfoliation

- Take 1/2 of the prepared scrub and apply all over the face and neck, avoiding the eye area.

- Wet your fingers with warm water and in a circular motion to promote cleansing and exfoliation of the skin, treat all areas for 3-5 minutes, paying attention to the nasal wings and T-zone.

- Thoroughly remove the remaining scrub with a warm, damp towel or large sponge.

STEP 4 – Skin Toning

- Saturate 2 cotton pads with Tonic and wipe the entire face, neck, and décolleté.

STEP 5 – Facial massage

- Warm the Yuzu Facial Massage Cream between your palms and spread over the entire face. Perform a massage for 15-20 minutes, paying attention to the neckline, neck, and shoulder girdle.

- If necessary, blot excess cream with a dry cloth.

STEP 6 AND 7 – Facial mask and hand care

- With a wide brush, apply the Yuzu Kaolin Face Mask, starting from the T-zone and spreading it over the entire face, neck, and upper décolleté, avoiding the eye area. Leave for 10-15 minutes. During the time of the mask, carry out the hand care procedure.

- Apply 1/2 of the remaining scrub to the back of the hand and massage the entire hand just above the wrist, concentrating on the fingers.

- Warm up 1.5 ml of Citrus Body & Hand Lotion

Mix between two palms and spread over the entire arm and forearm. Perform a hand massage for 2-3 minutes. Repeat on the second hand.

Removing the mask:

- Spread a warm, damp towel over the face and gently massage to remove the mask comfortably. Carefully remove the remnants of the mask.

STEP 8 – Toning

Saturate 2 cotton pads with Tonic and wipe the entire area affected by the mask.

STEP 9 – Moisturize

- Warm the Yuzu Face Cream between your palms and spread over the entire face, neck, and décolleté with light massaging toning movements.

STEP 10 – Aromatherapy

At the end of the procedure, rub the essential oil chosen by the client, dissolved in the Base massage oil, in the palms of your hands. Place your palms in a dome over your face at a distance of 10-15 cm and allow you to inhale the aroma for 5 breaths.

Micellar water	3-6ml
Yuzu Facial Cleansing Cream	2ml
Tonic for oily and problem skin	6ml
Yuzu Face Sugar scrub	6ml
Yuzu Face Massage Cream	3ml
Kaolin Yuzu face mask	5ml
Yuzu face cream	2ml
Citrus mix body lotion	3ml
Base massage oil	1ml
Essential oil (client's choice)	1drop

Face cream

Anti-Aging Face Cream

Cream for daily care of mature skin with an antioxidant effect. Thanks to the anti-inflammatory and antioxidant properties of chaparral extract, the cream enhances the natural properties of the skin while stabilizing cell growth. Reduces sebum and oily sheen, increases skin elasticity. Baobab tree extract relieves any discomfort on the skin - peeling, irritation and redness. Vitamin E protects skin cells from the aggressive effects of sunlight. The prickly pear extract helps to even out complexion and gives the skin a healthy glow.

Pomegranate Face Cream

An indispensable part of daily facial care during the active spring-summer sun with a powerful antioxidant effect. The pomegranate extract in the cream restores and deeply moisturizes the skin from the inside, stimulates the production of collagen, and improves skin microcirculation. The baobab tree extract relieves any discomfort on the skin - peeling, irritation and redness. Larrey extract and vitamin E protects skin cells from the aggressive effects of sunlight, in combination with the prickly pear extract helps to even out complexion and give the skin a healthy glow.

Jasmine Face Cream

Jasmine Sambac oil is highly valued for its rejuvenating and moisturizing effect on the skin. Baobab extract deeply restores and nourishes the cells of the epidermis. Vitamin E and bioactive extracts of prickly pear and larrea protect the skin from the action of free radicals released when exposed to UV radiation and prevent skin aging. With the help of vegetable squalane, cellular respiration and absorption of nutrients are improved. For well-groomed and radiant skin of the face, neck and décolleté!

Yuzu Face Cream

Toning cocktail of Yuzu essential oil, extracts of baobab, prickly pear, and larrea for dull dehydrated skin. By stimulating cellular processes and respiration, this cream balances the skin. The production of sebum is normalized, the water-lipid barrier is restored, the feeling of tightness and irritation disappears. The antioxidant complex protects the skin from the effects of harmful toxins and free radicals. Light texture and nourishing composition make this cream ideal for maintaining healthy and youthful skin at any time of the year.

with essential oils of lemongrass and lavender

Green tea

with extract and aroma of green tea

Mango

with extract and aroma of mango

Yuzu

with essential oil and aroma of yuzu

Bodhi massage oils are divided into two categories - aromatherapy and aromatic. The former consists of 100% natural oils with pure essential oils, which give the massage oil not only an aroma, but also aromatherapy properties. While the latter contain 98-99% natural massage oils which contain fragrance oils that are created by mixing various fragrance components in the laboratory. Since fruits, with the exception of citrus, do not produce essential oils, popular fragrances such as mango, papaya, or coconut are created by perfume companies. In our products, we use only those aromatic oils that are intended for cosmetics and are not harmful to the skin.

All Bodhi massage oils are formulated with coconut and rice bran oils. These are some of the most suitable oils for body massage and complement each other perfectly. Rice bran oil nourishes the skin with vitamins and antioxidants, while coconut oil, rich in fatty acids, fights dry skin by creating a protective barrier to keep moisture inside. The formulas of massage oils are balanced in such a way as to provide an optimal glide without leaving a greasy film on the skin and stains on sheets or towels. 20-30 ml of oil is enough for the whole body massage treatment.

1 and 5 l |
Consumption 30 ml

Aromatherapy Massage Oils

Anti-cellulite - With capsicum extract. Creates a hyperthermic effect for a corrective massage.

Orange-Ginger - With oils of bitter orange, lime, bergamot, ginger, and geranium. Improves microcirculation and metabolism in tissues.

Turmeric - Curcumin gives the oil healing properties, heals and restores the skin, relieves the skin of inflammation and rashes, and is also a powerful protection for skin cells during the active sun.

Lavender - With soothing lavender essential oil. For relaxing massages and relaxation treatments.

Lavender-Mint - Essential oils of lavender and peppermint refresh the skin, have toning and deodorizing effects, and nourish the skin with beneficial microelements, flavonoids, and antioxidants.

Lemongrass - Lemongrass essential oil controls the sebaceous glands of the skin, and has a powerful stimulating, toning, regenerating, and refreshing effect on the entire body.

Spice Therapy - The complex of essential oils of bergamot, kaffir lime, cloves, and black pepper gives the oil bactericidal, wound healing, and anti-inflammatory properties. Spicy notes warm and tone the body and mind at the same time.

Rose - The enchanting scent of rose is a feminine scent with aphrodisiac properties. It favorably affects the emotional and hormonal background of the female body, eliminates neuroses and gives strength.

Siamese Therapy - The floral herbal languid aroma of lavender and lemongrass creates a special aura, harmonizes and soothes, relieves irritability, and clarifies thoughts.

Floral Therapy - A bouquet of essential oils of lavender and chamomile have a sedative and calming effect on the nervous system, and normalize sleep.

Consumption 10 ml

Foot Massage Cream

The foot massage cream with menthol and camphor helps to relieve fatigue from overstressed legs and cares for the skin of the feet. The cream pleasantly cools the skin, deodorizes and gives a feeling of lightness in the legs. Menthol improves lymph circulation and promotes blood outflow, which helps to relieve swelling. Camphor works to relieve muscle spasms and eliminate pain in the joints and ligaments. Rice bran oil softens and nourishes the skin of the feet, protecting it from cracks and flaking. The cream has bactericidal and regenerating properties.

Massage Herbal Compress

The mixture of traditional Thai herbs used in compresses has a relaxing and invigorating effect on the body and emotional state, soothes sores and overworked muscles, while significantly increasing the body's energy reserves. The herbs in the compress have anti-inflammatory, antiseptic, astringent, and antioxidant properties.

200 gr

Body mask

Kaolin Detox mask

An effective mixture of antioxidants and active phyto-compounds protects skin cells from harmful UV radiation and environmental pollution. The porous structure of white clay and charcoal promotes deep cleansing of the skin, absorbing excess sebum and drawing out toxins, preventing rashes and inflammation. White willow bark extract also helps to gently and naturally exfoliate dead skin cells, which speeds up skin renewal and visibly evens out skin tone. Galacturonic acid from the prickly pear extract simultaneously protects and moisturizes the skin, eliminating the appearance of age-related and inflammatory pigmentation. Grapefruit oil refreshes, tones and improves microcirculation, which supports the internal and external health of the skin. The mask must be applied in a dense layer on problem areas or on the whole body for 20-30 minutes and rinsed off with water. A subsequent application of a moisturizing lotion or a massage with oil or cream is recommended.

1 Kg | Consumption 40 ml

Nourishing mask

Nourishing body mask based on coconut, rice bran oils, and Shea butter. Fatty acids restore the skin and improve its natural protective barrier, which prevents dehydration and the appearance of wrinkles. It strengthened cell membranes, improves metabolism, and stimulates the natural production of collagen and elastin. The use of the mask is ideal in the cold season or after prolonged exposure to the sun. The mask must be applied in a dense layer on problem areas or on the whole body for 20-30 minutes and rinsed off with water. A subsequent application of a moisturizing lotion or a massage with oil or cream is recommended.

Firming Mask

Firming body mask restores skin elasticity and tone thanks to active plant ingredients. Mate extract, Arabica coffee beans, and grapefruit stimulate skin microcirculation, improving tissue metabolism, which helps to eliminate flabbiness. Rice bran oil provides additional nutrition, hydration and saturation with vitamins A, E, C and antioxidants that help cell regeneration.

Horse chestnut and common ivy extracts regulate fluid exchange in tissues and reduce swelling. Antioxidants and microelements protect skin cells from premature aging and stimulate the production of skin collagen and elastin. The mask must be applied in a dense layer on problem areas for 20-30 minutes and rinsed with water. A subsequent application of a moisturizing lotion or a massage with oil or cream is recommended.

Kaolin Based Anti-cellulite mask

An anti-cellulite mask based on white clay and essential oils is an effective assistant in corrective procedures. The skin receives an active dose of antioxidants, minerals and vitamins. Horse chestnut extract, common ivy, and grapefruit oil work as weight loss activators, normalize cell metabolism and improve the appearance of the skin. The removal of toxins and slags is activated, puffiness decreases and the walls of blood vessels are strengthened. Mate leaf extract has a unique composition of various polyphenols and saponins, which, along with an Arabica coffee bean extract, effectively combat the appearance of an "orange peel", soften and prevent the appearance of stretch marks and spider veins. The drainage effect gives a visible result of express corrective procedures. Oils provide a deodorizing and tonic effect, improve blood circulation, even out the texture and tone of the skin. The mask must be applied in a dense layer on problem areas for 20-30 minutes and rinsed with water. Follow-up with the use of a Chili anti-cellulite massage cream or a Chili massage oil.

Mango Mask

A great addition to regular body skin care and a boost of tropical energy. The mask is enriched with Shea butter, coconut, and rice bran oils, which provide the skin with essential vitamins and microelements, deeply moisturizing, and eliminating peeling and fine wrinkles. Saturated and polyunsaturated acids from oils penetrate deep into the skin, restoring its health from the inside. The production of dermal collagen is stimulated, which restores skin elasticity. The mask must be applied in a dense layer on problem areas or on the whole body for 20-30 minutes and rinsed with water. A subsequent application of a moisturizing lotion or a massage with oil or cream is recommended.

Aromatherapy in SPA

Of all the senses, it is the olfactory receptors that are directly connected to the limbic system, the part of the brain that processes emotions and memories. The limbic system is the "emotional center" of the brain, which is why scents have the ability to evoke such strong emotional responses. Using a signature scent at a SPA creates an olfactory memory for guests based on their relaxing experience and is a great way to create an emotional connection with clients. Having enjoyed SPA treatments in an aromatic environment, each subsequent encounter with this scent will evoke positive feelings and emotions. This is an effective way to strengthen the brand and customer loyalty. Do you want to additionally please your regular guests? Find out which of the scents is their favorite and fill the room with it before the start of the treatment. Alternatively, you can use an aroma that matches the upcoming procedure. A client who has chosen a treatment with products from the mango line will surely experience positive emotions, feeling this sweet tropical aroma emanating from a lit candle, upon entering the treatment room.

Remember that essential oils are very volatile and their fragrance disappears almost immediately after use. Candles also fill the room with fragrance for a very short time after fading. If you want to scent a room on a permanent basis, choose aroma diffusers that will emit aromas for many months without any additional worries.

As our partner, you can also purchase home care and aromatherapy products on terms that will allow you to generate an additional source of income. The quality of the materials and packaging designs of the Bodhi retail range will enhance any space and allow you to offer your customers an additional service.
